
Data sources (stage 1 picks one)
Synthetic generator
synthetic_data.py
Local file
CSV / JSON / Parquet
BLTE
labeled dataset
HuggingFace
raw stream + GNN subset
Stage 1 · Load & clean transactions
+ per-address labels & tx aggregates
data_loading.py · _aggregate_tx_features
Stage 2 · Build MultiDiGraph
+ per-node structural features
graph_construction.py
--mode graph stops here
results/<ds>_graph.pkl
Stage 3 · Temporal motif fingerprints
per node, per δ
motifs/ via get_backend()
--mode motifs stops here
results/<ds>_fingerprints_<backend>_delta<N>.parquet
Stage 4 · Assemble feature matrix
aggregates · motifs · full
_stage4_assemble_features
Stage 5 · Train / detect
detection.py + evaluation.py
Stage 6 · Visualize
visualization.py
results/results_<tag>.json
matplotlib figures
